 [Resin](#)  [Finish Supplies](#)

Our flocking is made from a very fine cut fiber that has been custom dyed to our specifications. This fiber has a highly realistic property on scale models. This loose fiber material will work for carpeting, door panels, seats, headliners, heat insulation, and any other surface requiring a velour or upholstered finish. It works anyway you can apply white glue. Our colors have a flat, not shiny finish and they represent common automotive upholstery shades as well as some wild hot rod colors. Keep in mind, you can also custom blend any of the colors to create your own special color. Create an entire color scheme from inside to out, even the engine and wiring can match! Our flocking is easy to use and can add a whole new level of detailing to your next project.

SKILL: Average

PART #	Color
DM 1601	White
DM 1603	Lt. Grey
DM 1605	Grey
DM 1607	Dk. Grey
DM 1609	Black
